Part time/modular study

Many taught postgraduate programmes in the Faculty of Engineering and Computing permit part-time/modular registration, where module credits (denominated in accordance with the ECTS system) may be accumulated over a variable number of academic years to qualify for a particular award (postgraduate certificate, diploma or degree.) The annual fee for each academic year of study is then comprised of a fixed programme registration fee plus a variable modular credit fee (proportional to the total ECTS module credits registered for in that year). The programme registration fee is inclusive of all applicable student levies and capitation charges. Each individual postgraduate taught module typically corresponds to 7.5 ECTS. For guidance, a "full time" year of study is normally considered to equate to 60 ECTS of taught modules, plus, in the case of Master's programmes (M.Eng. or M.Sc.), a further 30 ECTS corresponding to an individual dissertation project or practicum. Please review the published documentation for each individual programme and/or award to verify whether part-time/modular registration is available. In general, modular registration is available only for students with EU fee status.

Part Time / Modular Fee Structure	EU National Fee
Fixed Fee per registration	
Programme Registration fee	450
plus	
Standard Postgraduate Module Fee (7.5 ECTS)	525
Masters Project/Practicum Fee (30 ECTS)	2,100

Please find modular fees in detail on page 16.
