Arctic research wins award

RESEARCH AT NEWCASTLE

'Our research has increased the knowledge of how glaciers are responding to a warming climate.'

On Norway's remote Svalbard island group, 650 miles from the North Pole, a team of eight Geography students from Newcastle researched the effects of global warming in the Arctic.

The students, whose project won a prestigious Arctic Club Award for innovative and adventurous expeditions by young people, were collecting the data they needed for their final-year dissertations.

Expedition leader, Holly, said: 'The Arctic is experiencing the effects of global climate change at roughly three times the rate of the rest of the world, which made it the perfect place for research, and meant we could see real change in the glaciers while we were collecting our results.'

'Our research has increased the knowledge of how glaciers are responding to a warming climate in the High Arctic – we were able to show that the rate of response is increasing, and there is a significant positive correlation to increasing air temperatures with glacial melt within the summer season.'

She added: 'Ice cap melt poses a huge threat to the world's population, particularly in places like Amsterdam and Hawaii which have low or negative sea levels. Huge volumes of melt water

stored in glaciers means these settlements could be at risk of significant flooding in 100–200 years' time.

'More research is needed, but our findings will feed into that future research.'

The team had to raise over £10,000 to fund the expedition* and during the project were based at the University Centre in Svalbard (UNIS), the world's northernmost institution for higher education and research.

Divided into two teams focusing on water and land processes, they had a 45-minute trek every day across glacial streams, ice and scree, to reach Svalbard's Longyearbyen glacier. Once there, they carried out their experiments using a variety of field techniques, including mapping and water chemistry analysis.

Holly said: 'Each member of the team completed their own research, ranging from assessing the amount of sediment present in meltwater across the summer season, to how much ice is being lost from the glacier during peak melt.'

'The whole experience was very rewarding; in fact, it's inspired an interest in the world's response to climate change that has led myself and three other team members to pursue study at postgraduate level at Newcastle.'

Newcastle strikes gold

EDUCATION AWARDS

'The awards are very important in terms of recognising great teaching.'

When Newcastle University struck gold in the national Teaching Excellence Framework it came as no surprise to students.

Every year they vote in their hundreds for their most inspirational teachers and support staff who are then honoured at the University's own celebration of excellence – The Education Awards.

Chemical Engineering with Industry student, Deema, successfully nominated Newcastle's Dr Kamelia Boodhoo for the Outstanding Contribution to Student Employability award, in recognition of the way in which she supports students on placement.

After completing a paid placement year with engineering business Cummins UK to develop her practical skills in an industry environment, Deema carried out a research project with the company during the fourth year of her degree.

'The project was investigating biofuel combustion as opposed to natural gas and its effects in lowering harmful engine emissions,' Deema explained.

'I contacted Dr Boodhoo for advice and she got in touch with Prof Nilanjan Chakraborty at Newcastle. He's a leading expert on internal combustion and was able to bring his expertise to the project.'

Deema added: 'Throughout my placement year Dr Boodhoo was so supportive. She's the programme director for my course and it was a great opportunity to work more closely with her.'

'She visited me during my placement; she visited all placement students. We were all feeling the same – unsure about how we were going to manage working on a full-time basis as well as writing our dissertations.'

'She was very encouraging and we talked about issues and concerns more like colleagues than lecturer and student.'

'Without Dr Boodhoo's support my placement year would have been a lot more difficult.'

Organised by the Students' Union, The Education Awards include categories for teaching, emotional and spiritual support, careers support, equal opportunities, research and supervision.

Deema said: 'The awards are a crucial part of influencing teaching quality at Newcastle. They're a chance for the University to view teaching from the students' perspective, and they are very important in terms of recognising great teaching ability and techniques.'

'The results were announced during an awards ceremony which we attended together. When Dr Boodhoo won it was one of the highlights of my degree course.'

Catering for business success

EMPLOYABILITY

'We wanted to create a business that puts good food at its heart.'

Indonesian culture and cuisine are the main ingredients in a start-up catering company launched by two friends and fellow Newcastle graduates.

Architecture graduate, Monica, and Combined Honours graduate, Kezia, joined forces to set up Waroeng Indonesia – meaning a small restaurant that brings people together from all parts of society.

Monica said: 'Indonesian food is seen as a communal affair and Waroeng is a place where people can share good food and socialise.'

'We wanted to create a business that puts good food at its heart: food that brings a community together.'

The friends, who both come from Jakarta, had already worked on a successful project raising money for disadvantaged children in Indonesia.

During the final year of their degrees, and wanting to set up their own business, they approached START UP, the University's Careers Service support for students and recent graduates hoping to run their own companies.

As part of her studies, Kezia completed a paid work placement with the University's marketing department to develop her skills in market research, event planning, and digital and social media communication – skills needed for their fledgling business venture.

On graduation, with help from the Careers team, they secured Graduate Entrepreneur visas to stay in the UK and successfully pitched their idea for Waroeng Indonesia to UNLtd, an organisation that funds social entrepreneurs.

Kezia said: 'I volunteer with NEST, the Newcastle Students' Union initiative to support and provide educational opportunities for refugees in the North East, so the initial idea was for us to host social dinners for this community.'

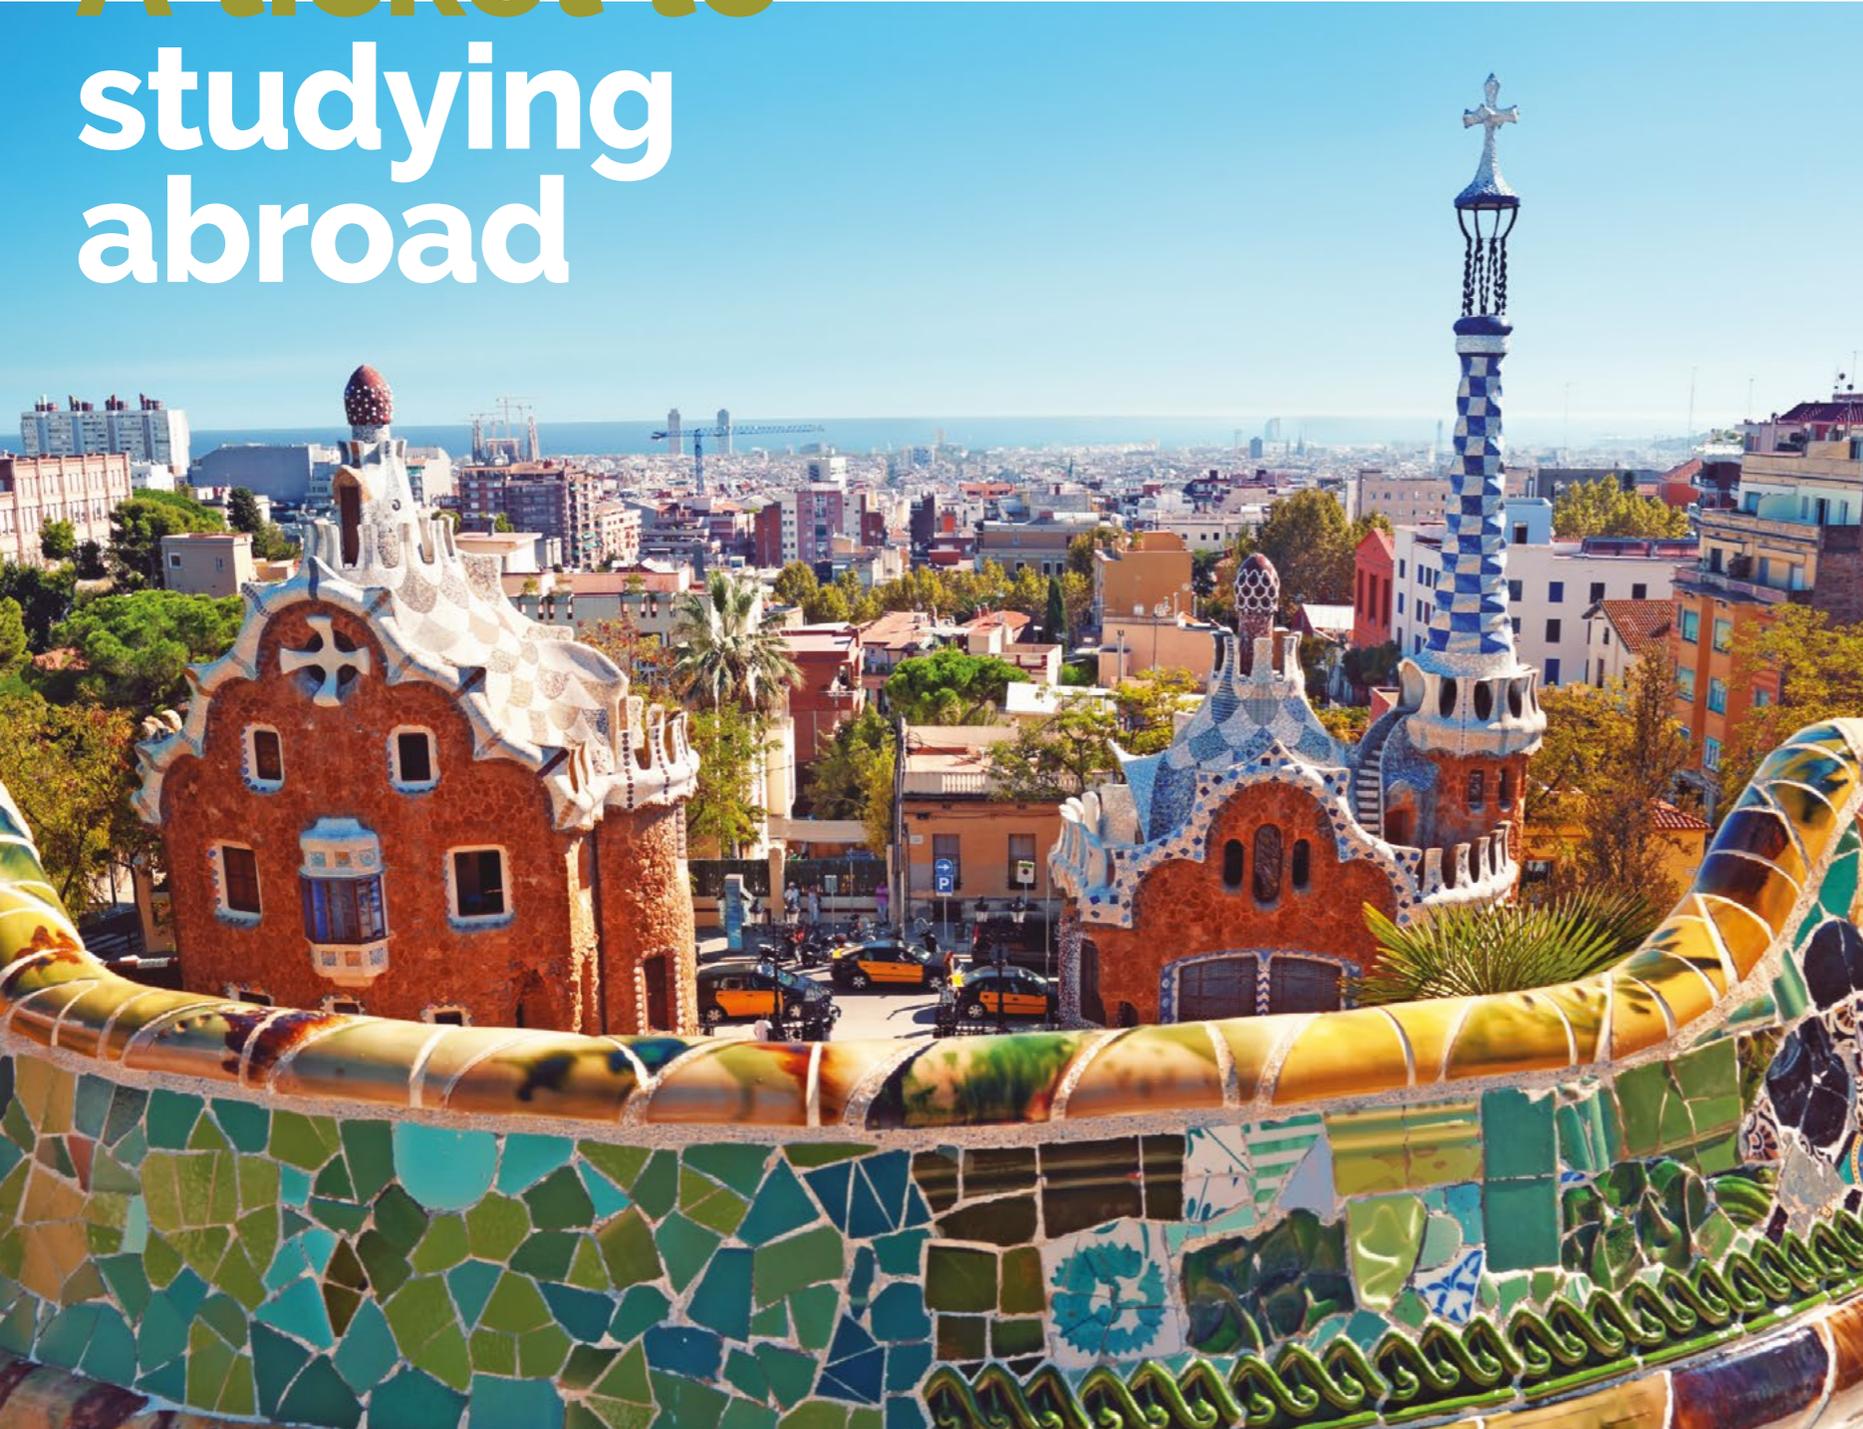

'Since then, we've staged pop-up events at Kommunity, a Newcastle charity that promotes art and culture for all and cooked for over 1,000 people during a month's residency at By the River Brew Co., an independent business community based under Newcastle's Tyne Bridge.'

'We've also secured deals with business and private clients.'

From initially working out of their own kitchens preparing the delicious stews, curries, noodles and delicate pastries typical of Indonesian cuisine, the duo soon progressed to renting business premises and are now looking to expand again.

Kezia said: 'We have a real sense of pride in our culture and although Indonesian food isn't as popular as Korean or Japanese food, we're hoping more people will start to enjoy it. Now, we're looking at getting more clients and scaling up the business.'

A ticket to studying abroad

OPPORTUNITIES TO STUDY ABROAD

'Studying abroad truly is a once-in-a-lifetime experience.'

Barcelona was the dream destination for Law student, Josh, when he applied to spend a year studying abroad.

Now he's broadening his knowledge of EU and international law at Pompeu Fabra University in the historic Spanish city as part of his four-year degree.

He said: 'It's really exciting to learn the law of a different country and both Newcastle and Pompeu Fabra universities offer the flexibility to study a range of subjects. You can choose your modules, so I'm also studying some politics and criminology modules.'

'During my time in Barcelona, I've been meeting people from all around the world. So, not only am I learning about Spain's culture, I'm also learning about the cultures of the friends I'm making from other countries.'

'Spanish culture is so different from the UK's and it has been so much fun learning about it and enjoying it.'

Although Josh will spend a full academic year in Barcelona, study abroad opportunities offered by other degrees, as either optional or compulsory modules, can vary in length.

He said: 'Although the opportunity to study abroad may seem scary at first, it offers many invaluable things which people don't realise. The local traditions and language are only a small snapshot of the things you learn throughout your time in the country.'

'Many courses are taught in English and the skills you develop on your year abroad will stay with you for a lifetime.'

'The study abroad programme also looks amazing on your CV to future employers. Not everyone can say they've lived independently in another country, adapting to the many differences while studying and performing well in their degree.'

'Studying abroad truly is a once-in-a-lifetime experience. Once you start working life, you won't get many opportunities like it again!'

Josh added: 'I'm a regular person from a normal background and through hard work and determination I got into the university of my choice – and I'm really enjoying it.'

'My time at university has been filled with opportunities; you honestly won't regret choosing Newcastle.'

Become part of our

Forging new friendships

ACCOMMODATION

'Moving into halls is the best way to make new friends.'

'Living away from home adds a whole new dimension to going to university,' said Daniel, who is enjoying his new-found independence at Newcastle.

'In fact, moving into University accommodation is one of the best things I've ever done – and it's the best way to make new friends and lasting friendships.'

Daniel, who is studying Politics and Sociology, is sharing a six-bedroom flat in University accommodation at Windsor Terrace.

He said: 'The mix of three boys and three girls in our flat is great, it helps with the dynamic and it's actually easier to make friends with other students because we are this diverse group.'

'In my flat there's someone from Wales, a student from Ireland and another from South Africa, so it's interesting hearing about where people are from, sharing stories, cooking and housekeeping.'

Daniel was able to choose from catered and self-catered accommodation offering both *en suite* rooms and bedrooms with washbasin facilities. After meeting certain criteria as a first-year student, he was guaranteed a place in University accommodation close to the city and campus.

He said: 'I knew I didn't want to be too far from campus and I thought this location was perfect. Windsor Terrace is on campus, just five minutes' walk from Northumberland Street for shopping and close to the Grainger Market for fresh food.'

'My accommodation is on the cheaper side compared to some, so I wasn't expecting it to be so modern, but everything is really well kept – the kitchen is nicer than mine at home!'

He added: 'Although I was excited about going to university, meeting new people and doing new things, closer to the time of moving in I started to think "what if I don't make any friends?" But by the end of the first week everyone in the flat was getting to know each other and feel comfortable with one another.'

'Now, we're all saying it will be sad to move out at the end of first year; we don't really want to leave.'

Daniel has arranged to live with three of his flatmates again next year, and said: 'You see your flatmates every day; they are the first people you meet when you start university, so the friendships you make are solid.'

Joining Team Newcastle

SPORT AND SPORTS SCHOLARSHIPS

'Coaching allowed me to feel part of a team again.'

Teaming up with Newcastle University allowed elite netball athlete, Farah, to combine playing at national level with studying for her Medicine degree.

Farah said: 'I had offers from both Leeds and Newcastle, but coming here meant I could continue training with a team in the Vitality Netball Superleague.'

'I'd also heard about Newcastle's sports scholarship programme for promising athletes so I applied and that gave me access to a great package of funding for match travel, as well as professional coaching from the University, sports kit and gym membership.'

Farah's love of netball started when she was at school. She joined a local club that she still plays for today and, after success at first county and then regional trials, was invited to join a team in the Superleague – the UK's elite netball competition featuring 12 squads from England, Scotland and Wales.

Once at Newcastle, where netball forms part of the Team Newcastle Performance Club initiative, Farah joined a programme of advanced court and skills training, dedicated strength and conditioning sessions, and match play.

She became president of the netball club and competed in both the British Universities and Colleges Sports (BUCS) league and the North East regional leagues.

She said: 'Playing sport at that level is very time consuming; you do have to balance things and you've got to be disciplined in what you're doing. But I love netball; I love it from an exercise point of view, but also because it is a great team sport.'

However, in her third year, Farah collapsed from a suspected autoimmune illness that left her in a wheelchair.

With support from the University she put her degree on hold while she recovered, but after just six months, and desperate to get back on a netball court again, she enrolled on a coaching course.

Now, with financial and practical support from the Student Health and Wellbeing Service and the University's Sports Centre, she's returned to her studies, is employed by the University as a netball coach and is getting back to full fitness – she completed Newcastle's Great North Run in September.

She said: 'Coaching some of the University teams has let me be part of that world again. I was itching to get back because I couldn't play, so coaching was the next best thing; it's allowed me to feel part of a team again.'

Taking a different route

OUR SUPPORTED ENTRY ROUTE

'Applying through PARTNERS secured my place at University.'

English language student, Sam, doesn't like heights, but when he got the chance to climb the city's 130ft Grey's Monument for a spectacular bird's eye view of Newcastle, he felt confident to give it a go.

Sam joined Newcastle University as a student through the PARTNERS Programme. This supported entry route offers a range of support and opportunities to help young people develop the skills necessary to be a successful student.

Sam was initially uncertain about his journey to University. He said, 'When I was applying, I told a member of college staff that I wasn't sure I wanted to go.'

Sam was encouraged to apply through PARTNERS by a teacher. 'It was mentioned a lot at college. It helped that my college lecturer actually got into Newcastle University through PARTNERS, so she'd always mentioned it!'

Through PARTNERS, future students can receive a lower conditional offer to Newcastle University and be supported through the transition from school or college to University.

Applicants must meet certain eligibility criteria and complete a free summer school after Year 13 or their final year of college. The summer school gives future students a taste of University life, and once their course begins PARTNERS students are offered extra support while settling in.

'Summer school was a good week,' said Sam. 'I remember everyone on the PARTNERS Programme getting along really well. There were some great bonding exercises put on to help students feel comfortable.'

'I was applying to do History back then, and we had a lecturer from North Shields teaching us about local history. It was great because the lecturer was really engaging and fun.'

Taking part in the PARTNERS Programme meant that Sam secured a place on his chosen course. 'I actually didn't get the grades I needed to study History, but later when I decided I wanted to do English Language, the admissions team saw my completion of summer school as evidence that I was a committed and eager student who really wanted to be here at University.'

Sam is now employed as one of the activities assistants for the Give It A Go (GIAG) events programme, an initiative run by the Students' Union which supports and encourages students to get involved with activities, make friends, and enrich their University experience.

'I think PARTNERS gave me a good philosophy in regards to University, to just get involved in anything that's going on,' said Sam. 'There were so many benefits, and understanding how different University life would be helped me to feel more confident about going.'

Feeling
at home
in the city

STUDENT LIFE IN NEWCASTLE

'There really is something for everyone in Newcastle. I'd like to make my forever home here.'

Master of Planning student, Amy, lost her heart to Newcastle the minute she set foot on campus.

'The first time I visited Newcastle was for an Open Day and I just fell in love! So much so, that I turned down my other offers and decided if I couldn't go to Newcastle, I wouldn't go to university at all,' she said.

'Everyone is so friendly, the campus is beautiful, all the accommodation is close by and the city centre is on your doorstep. Newcastle really is the perfect student city!'

As soon as she arrived here, Amy set out to explore the city with one of her flatmates.

She said: 'I couldn't wait; I was so excited. At first the city felt as if it was huge, but because the campus is in the city centre we soon found everything we needed. It struck me then what a really great place this is for students.'

'The way Newcastle is laid out is so convenient; you don't have to get on a bus – everything you need is close by and accessible.'

'My favourite place is the Quayside which is a great place to socialise, but also if you just want to go for a run by the River Tyne.'

'I also love the campus. The buildings are stunning and there are lots of places where you can arrange to meet friends and have your lunch sitting out on the grass on a sunny day.'

Now in the third year of her degree, Newcastle has also become Amy's classroom as she is basing her dissertation on one of its most architecturally beautiful streets – Grey Street.

'The architecture along Grey Street is amazing and there are some great restaurants, shops and bars there,' she said.

'My degree has a town planning focus, so I'm looking at wheelchair accessibility in this area and how people can access all these facilities.'

'After my degree I'd like to think that I could live here permanently, because there really is something for everyone in Newcastle. I'd like to make my forever home here.'

An international experience

MEET PEOPLE FROM AROUND THE GLOBE

'You soon mix in and become part of the crowd.'

'Newcastle is a great option for international students,' said Harsh, who has travelled half-way round the globe to study here.

Although moving to Newcastle was the first time the Business Management student had been away from his home in India, Harsh was keen to study at a prestigious university in the UK.

A talented student, he'd been offered scholarships to a number of UK institutions, but decided to accept the Great India Scholarship, sponsored by Newcastle University and the British Council India.

'My main reason for coming to Newcastle was the emphasis that's put on an applied approach to teaching here, which is so much better than in my country,' Harsh said.

'I come from a business-focused family and knew from an early age I would be going into the family business – it was already a field of interest.

'I chose to do a BA in Business Management, which encompasses marketing, entrepreneurship, finance, and human resources. My degree is very flexible with very good module options.'

Harsh's decision to study at Newcastle was fully supported by his family. He said: 'My dad was really positive about it;

he said I would be able to build a good network of friends and contacts.

'And my cousins, who have also graduated from UK universities, were very encouraging. They said that while choosing a respected university is important, it's not just about that – the town or city where you are going to live matters, too; it's all part of the experience.

'For me, Newcastle is the most student-friendly city with great nightlife and restaurants.'

Harsh added: 'After the first week I was a little homesick, but I spoke to the University's Student Services and they said it was completely natural; that I should get involved in events and that would distract me. That support really helped and that's what I did.

'During Freshers' Week I made a lot of friends that I'm still in touch with. I got involved in so many activities; it was a great way to meet people.

'Newcastle's student society system is also excellent. I was interested in the investment and entrepreneur societies and they host very good networking events.

'You soon mix in and become part of the crowd.'

Find the degree for you

What do you want to study? At Newcastle you'll get a world-class education, and leave as a highly desirable graduate prepared for your career.

Whether you're looking for a course with professional accreditation, or one that offers the chance to study abroad* or undertake a work placement, this quick guide will help you choose the right degree for you.

Most of our degrees are three, four or five years in length, depending on the subject you choose and whether you opt to undertake study abroad or a work placement as part of your studies.

Some of our study abroad and work placement opportunities are offered through the Erasmus+ programme. For the most up-to-date information on these opportunities visit www.ncl.ac.uk/mobility/newcastle

More details on our degrees, including full entry requirements and information on fees and funding, can be found at www.ncl.ac.uk/undergraduate/degrees

Check more detailed specific subject requirements for your chosen degree on our website.

Your Application

We welcome applications from students from a wide variety of backgrounds who can show the motivation, ability and potential for university study.

We also accept a broad range of qualifications.

Applying to Newcastle University

All applications need to be made through UCAS at www.ucas.com

The institution name and code for Newcastle that you will need for your UCAS application are **NEWC** and **N21**.

Before you apply, check online for the most up-to-date course and entry requirement information for your chosen degree at www.ncl.ac.uk/undergraduate/degrees

Support for students with additional needs

Contact us before you apply if you have a disability, specific learning difficulty or a long-term mental health condition. We can help you find out more about the University's provision and the support available.

We encourage you to disclose any information relating to your disability or medical condition on your UCAS application. Any information you submit will help us to support you on admission. www.ncl.ac.uk/students/wellbeing

International students

We accept a number of international qualifications for entry on to our undergraduate degrees. Check the entry requirements page of your chosen degree online for specific entry requirements and English language requirements www.ncl.ac.uk/undergraduate/degrees

PARTNERS Programme – our supported entry route

PARTNERS is our University access programme and is open to all eligible students in the UK. It includes a programme of support which will help you to develop essential skills and prepare you for university.

Applicants receive a PARTNERS offer which could be up to three grades lower than the

If you are studying qualifications that are not listed on our website, please contact Student Services to confirm the acceptability of your qualifications.

If English is not your first language, you will need to show that you have an adequate knowledge of written and spoken English before you begin your studies. We typically require a score of IELTS 6.5 or equivalent for direct entry to the University.

Disclaimer

Although great care is taken in compiling this Undergraduate Guide, it is for the general guidance of prospective students only. This publication is intended for those who are interested in applying for admission to the University in 2020 and is intended as advance publicity for information and guidance purposes only. Details included are correct at the time of going to print in April 2019. The most up-to-date and detailed source of information at any time is the undergraduate website at www.ncl.ac.uk/undergraduate

The matters covered by this publication are subject to change from time to time, both before and after a candidate's admission. Unavoidable changes may on occasion have to be made, affecting the availability of degree programmes, subjects, modules and options within degree programmes, and of additional opportunities such as placements, field trips and exchange visits. Reasons for change could include timetabling issues, changes in staff, requirements of programme-accrediting bodies, academic changes within subject areas, or due to minimum student numbers on a course.

Full details of the University's terms and conditions, including reference to all relevant policies, procedures, regulations and information provision are available at www.ncl.ac.uk/pre-arrival/regulations

The University is not responsible for the content of any websites which do not form part of the Newcastle University domain (www.ncl.ac.uk) and whose addresses are given in this publication.

Equal opportunities

The University's Equality Strategy is our public declaration of our commitment to develop a fully inclusive University community, which recruits and retains talented staff and students from all sectors of society equally. www.ncl.ac.uk/diversity

Alternative formats

We can provide information on any of our courses, and on student life in Newcastle, in alternative formats. Please contact Student Services for more information.

The University is committed to making our website, and the material provided on it, as accessible as possible. www.ncl.ac.uk/info/accessibility
