

OVERVIEW

The ever-increasing role of computers in society will continue to require skilled developers to design, develop, and implement software based solutions and products for business and consumers. Software applications systems connect you to a computer, tablet, smartphone or mobile device. Each year, enterprising developers and companies create an array of cloud, mobile and web-based offerings designed to make business more effective and our lives more enjoyable. ECPI University's Mobile Development track in the Software Development major offers a skills based program utilizing the latest in technology across platforms using virtualization. ECPI's programs encourage students to obtain industry certifications and internships for real world experience that enhances graduate opportunities.

If this sounds like the career you've been looking for, choose the Mobile Development track and the Software Development major in the Computer and Information Science bachelor's degree. Through ECPI University's year-round schedule, you could graduate in just 2.5 years!

PROGRAM OUTCOMES

Students majoring in Software Development in the bachelor's degree in Computer & Information Science program learn how to manage projects, design and write different computer programs, create interesting web pages, use and maintain databases, and install and secure computer networks. Students also learn to provide excellent customer service when assisting customers and clients with technical issues.

COMPUTER AND INFORMATION SCIENCE OUTCOMES:

- Use processes, tools, and technologies to support an organization
- Lead and work as a member of a technical team
- Apply written, oral, and graphical communication in both technical and non-technical environments
- Identify and use appropriate technical literature
- Engage in continuous professional development through user groups, associations, conferences, readings, research, and other channels.
- Develop and use ethical best practices in the maintenance and security of information and systems

SOFTWARE DEVELOPMENT MAJOR OUTCOMES:

- Use cloud computing tools
- Design and develop secure mobile solutions using object-oriented principles
- Develop integrated mobile systems solutions to access organizational databases
- Plan secure mobile solutions with customers

COLLEGE OF TECHNOLOGY

POSSIBLE CAREER TRACK

According to the U.S. Bureau of Labor Statistics, employment for software developers between 2014 and 2024 is expected to increase by 17%, which is much faster than the average for all occupations (14%).*

Software Development graduates in the Mobile Development track are prepared for entry level positions in a wide spectrum of industries, including:

- Social Media
- Education
- Defense
- Healthcare
- Advanced Manufacturing

Job titles for these positions include:

- Mobile Application Developer
- Cloud Application Developer
- Web Developer
- Software Developer
- Software Tester
- Software Analyst

* Derived from U.S. Dept. of Labor
Bureau of Labor Statistics Occupational
Outlook Handbook, 2016-17 Edition
