About us

- **An innovative university**
- **Study in an international setting**
- **Internationally recognized quality**
- **Honorary PhD recipients**

An innovative university connected with the professional world

Universidad Europea, with four campuses in Spain, two in Madrid (Villaviciosa de Odón and Alcobendas), one in Valencia and another in the Canary Islands (La Orotava), is an innovative institution geared towards adding value to society and contributing to its progress.

Our goal is to provide you with a personalized development plan from the moment that you start at the university. We are able to do this thanks to our international educational model which is connected with the professional world and of outstanding academic quality.

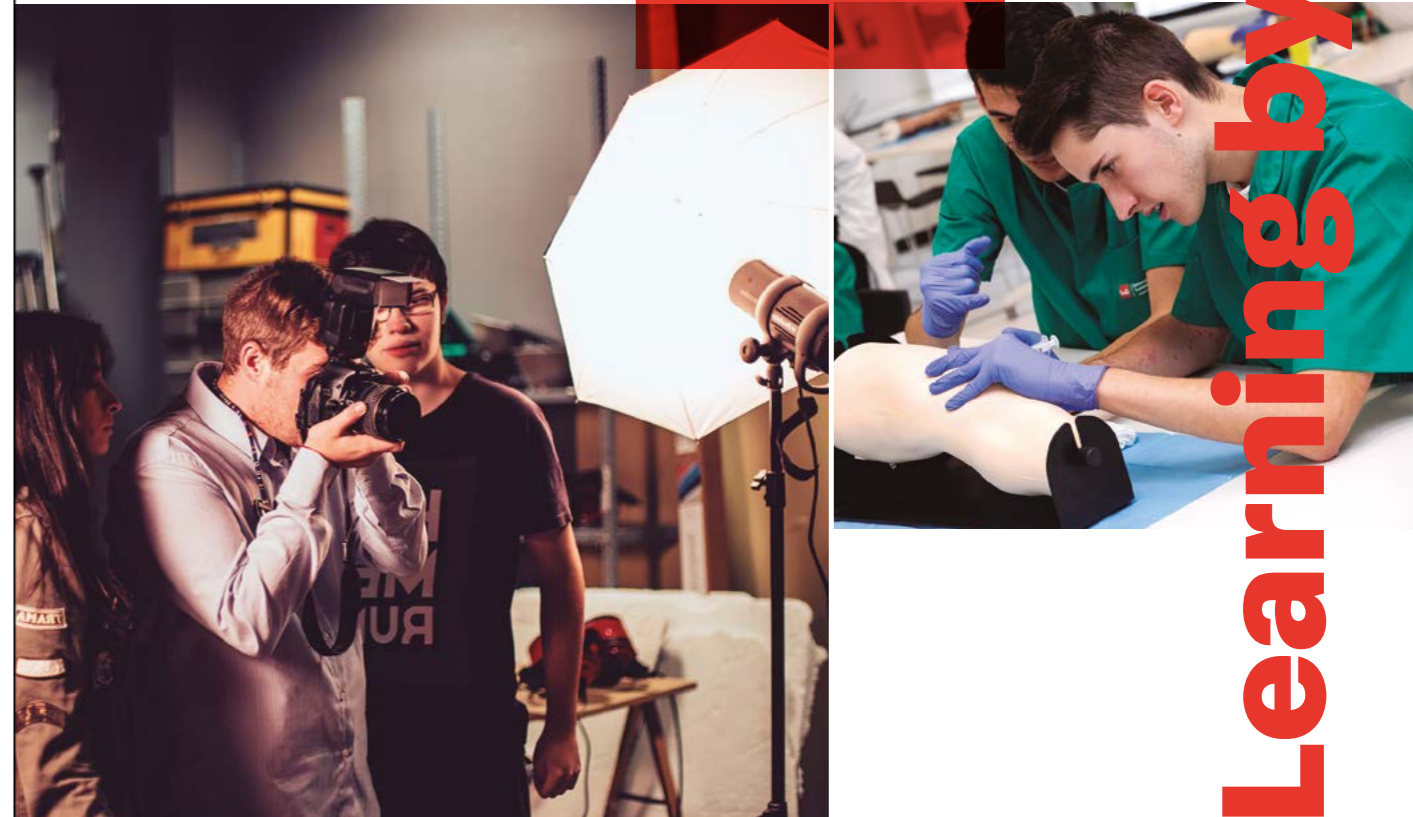

Our comprehensive education trains leaders and professionals who are equipped to address the needs of a global environment, bring value to their professions and contribute to social progress with an entrepreneurial approach and ethical commitment.

We consider academic excellence to be one of our strategic pillars.

At Universidad Europea you acquire knowledge and develop skills and values through an educational model in which you learn by doing, in an interdisciplinary and international setting where you are immersed in the profession from day one, and through the use of space and technology that has revolutionized learning.

Learning by doing

Study in an international setting

Laureate International Universities.

Universidad Europea is the **only Spanish institution** that is a member of an international university network: Laureate International Universities, committed to an education with international values, favoring a more competitive profile for our students. Our campuses have a strong **international feel**, with a much higher average number of foreign students than any other Spanish university: **25% of your classmates will be from other countries.**

Bilateral exchange agreements with prestigious Universities from more than 40 countries

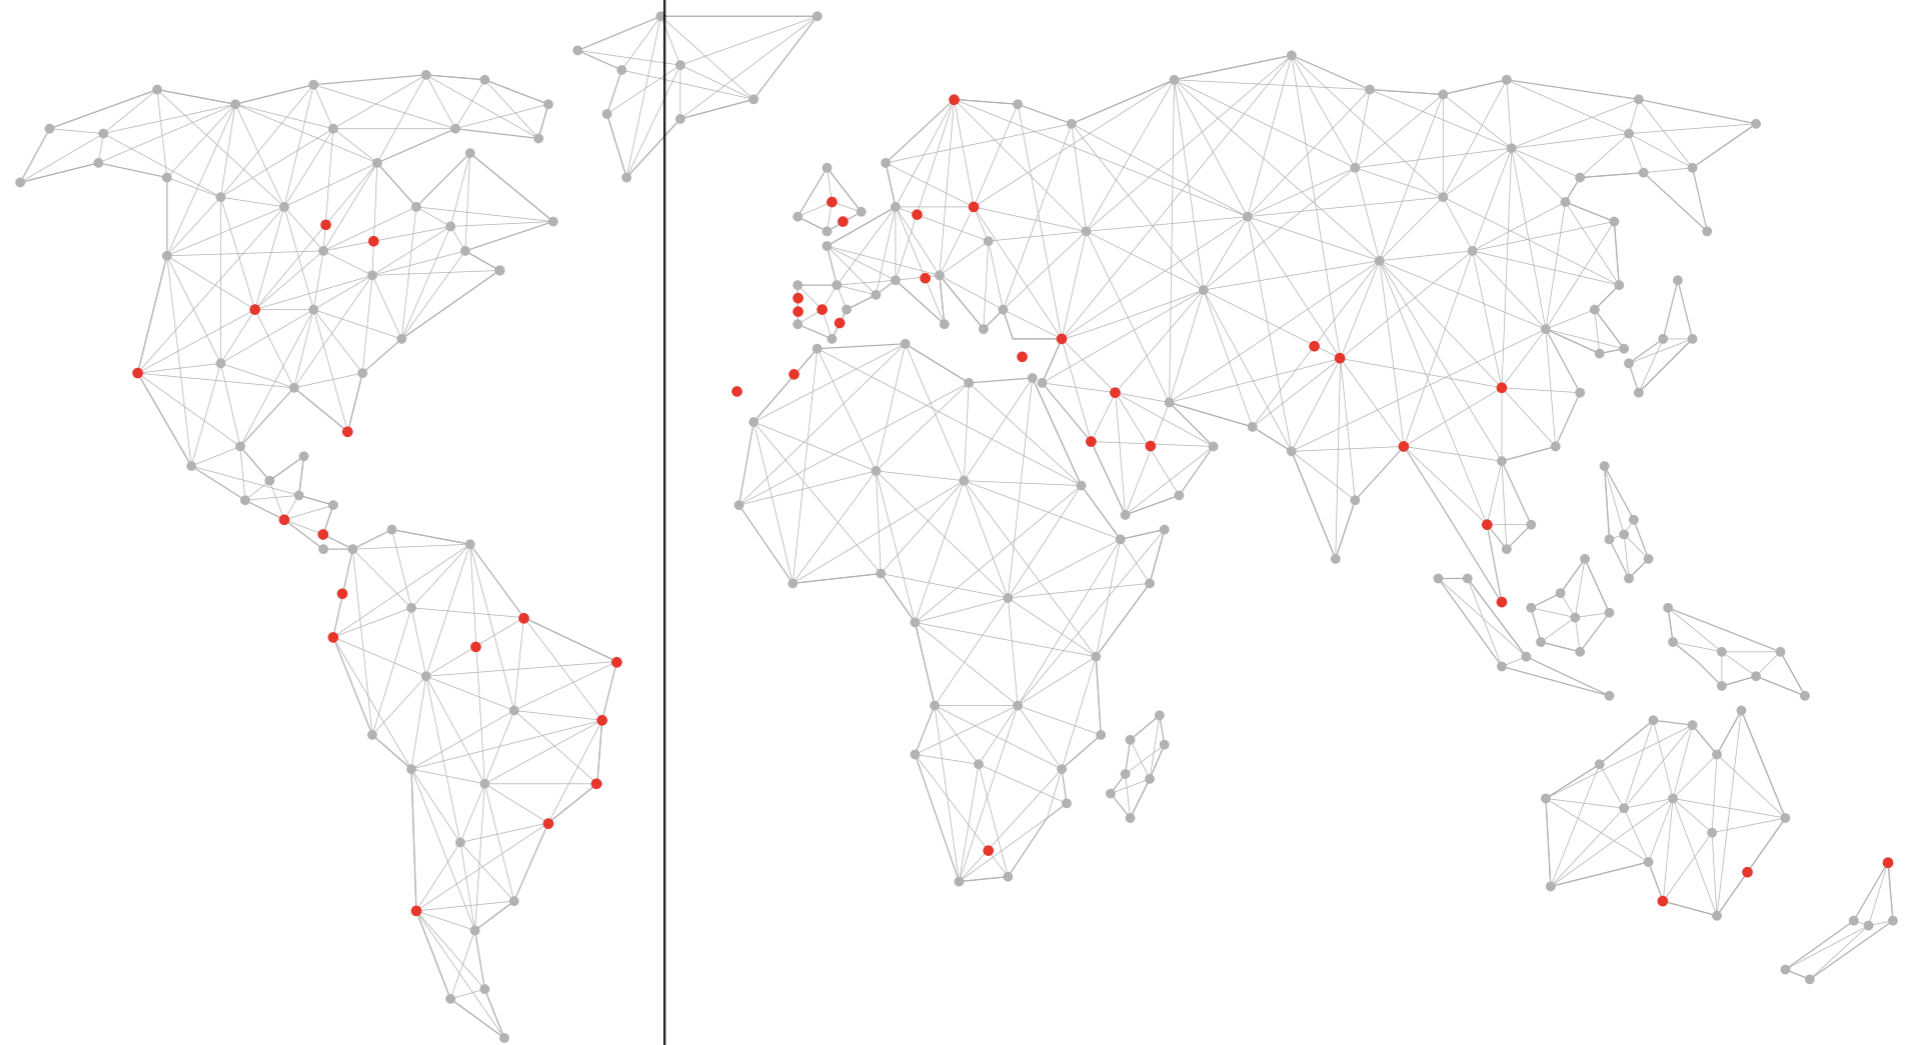

Our comprehensive and international approach is designed to help you find career success in any country in the world.

Our academic offer includes more than 70 bilingual or fully English-taught programs. Last year 22% of graduating students had spent a period of study abroad.

Here for good. Our commitment to society.

We believe in the power of education to generate change and we maintain a firm commitment to making a positive impact on the communities around us.

As part of the collaboration between the International Youth Foundation and Laureate International Universities we organize the Young Social Entrepreneurs Award, each year rewarding ten young people who are developing a project with social impact.

Internationally recognized quality

QS STARS

We have received recognition from independent bodies that have accredited the quality of our institution, such as the "QS Stars" international rating system, which has awarded us four out of five stars. We have also received the rating's maximum score of five stars in Employability, Teaching, Facilities and Social Responsibility.

QS is an international organization that prepares one of the three most prestigious university rankings in the world, along with the Times Higher Education Ranking and the Academic Ranking of World Universities.

EFQM

The European Foundation for Quality Management (EFQM) has awarded us with the European Seal of Excellence 500+. It is the maximum recognition granted by this organization, and highlights excellent organizational management.

Chinese Ministry of Education

We have been included in the list of universities registered by the Ministry of Education of the People's Republic of China, which means we are one of the Spanish universities officially recommended by the Chinese Government for its students who want to study abroad.

University life

- A unique university experience
- Get involved in our events
- Round tables, conferences and seminars

""For me, clubs meant discovering what you can achieve by working on a multidisciplinary team, in addition to what you learn from other disciplines, not just knowledge but on a personal level. You create a family, and enjoy it.""

Eduardo González Requeijo
Student representative for Architecture, Art and Design programs

Enjoy...

a unique university experience.

At Universidad Europea you will be immersed in an environment of learning, innovation and growth from the get-go, where the **university experience** plays an essential role.

Get involved in events that contribute to your personal and professional development

Handstinking:

Students from the School of Architecture, Engineering and Design organize **an event that is open to the public where they present their projects and get involved in workshops that use teamwork to resolve a challenge.** At the Emergency Architecture Workshop, students gain experience and learn to build emergency housing using one of the fastest growing plants in the world: bamboo.

Sierra Nevada World Championship:

Students take part in organizing this prestigious championship, train with elite athletes and get their advice.

"We've trained with many elite athletes who gave us advice that will last me a lifetime."

Víctor Manuel Álvarez

Student on the Bachelor's Degree in Sports Science

Communication Week:

During this week students take part in **workshops that help them understand the reality of all Communication disciplines:** future advertising agents learn from the executives of Campofrío how their brand has evolved from product communication to "love brand" communication, and **journalists and communicators learn the secrets to create successful formats from professionals such as Pepa Bueno or Carlos Sobera.**

Teddy Bear Hospital:

This fun event is organized by students of Medicine. They teach children about the concepts of Medicine, letting them experience the role of doctors for themselves. Students also get a chance to work with pediatric patients.

"The goal is for the little doctors, through their teddy bears, to come into contact with the medical profession and dispel the fears that doctors sometimes cause them."

José María Alonso

President of the Medical Student Association

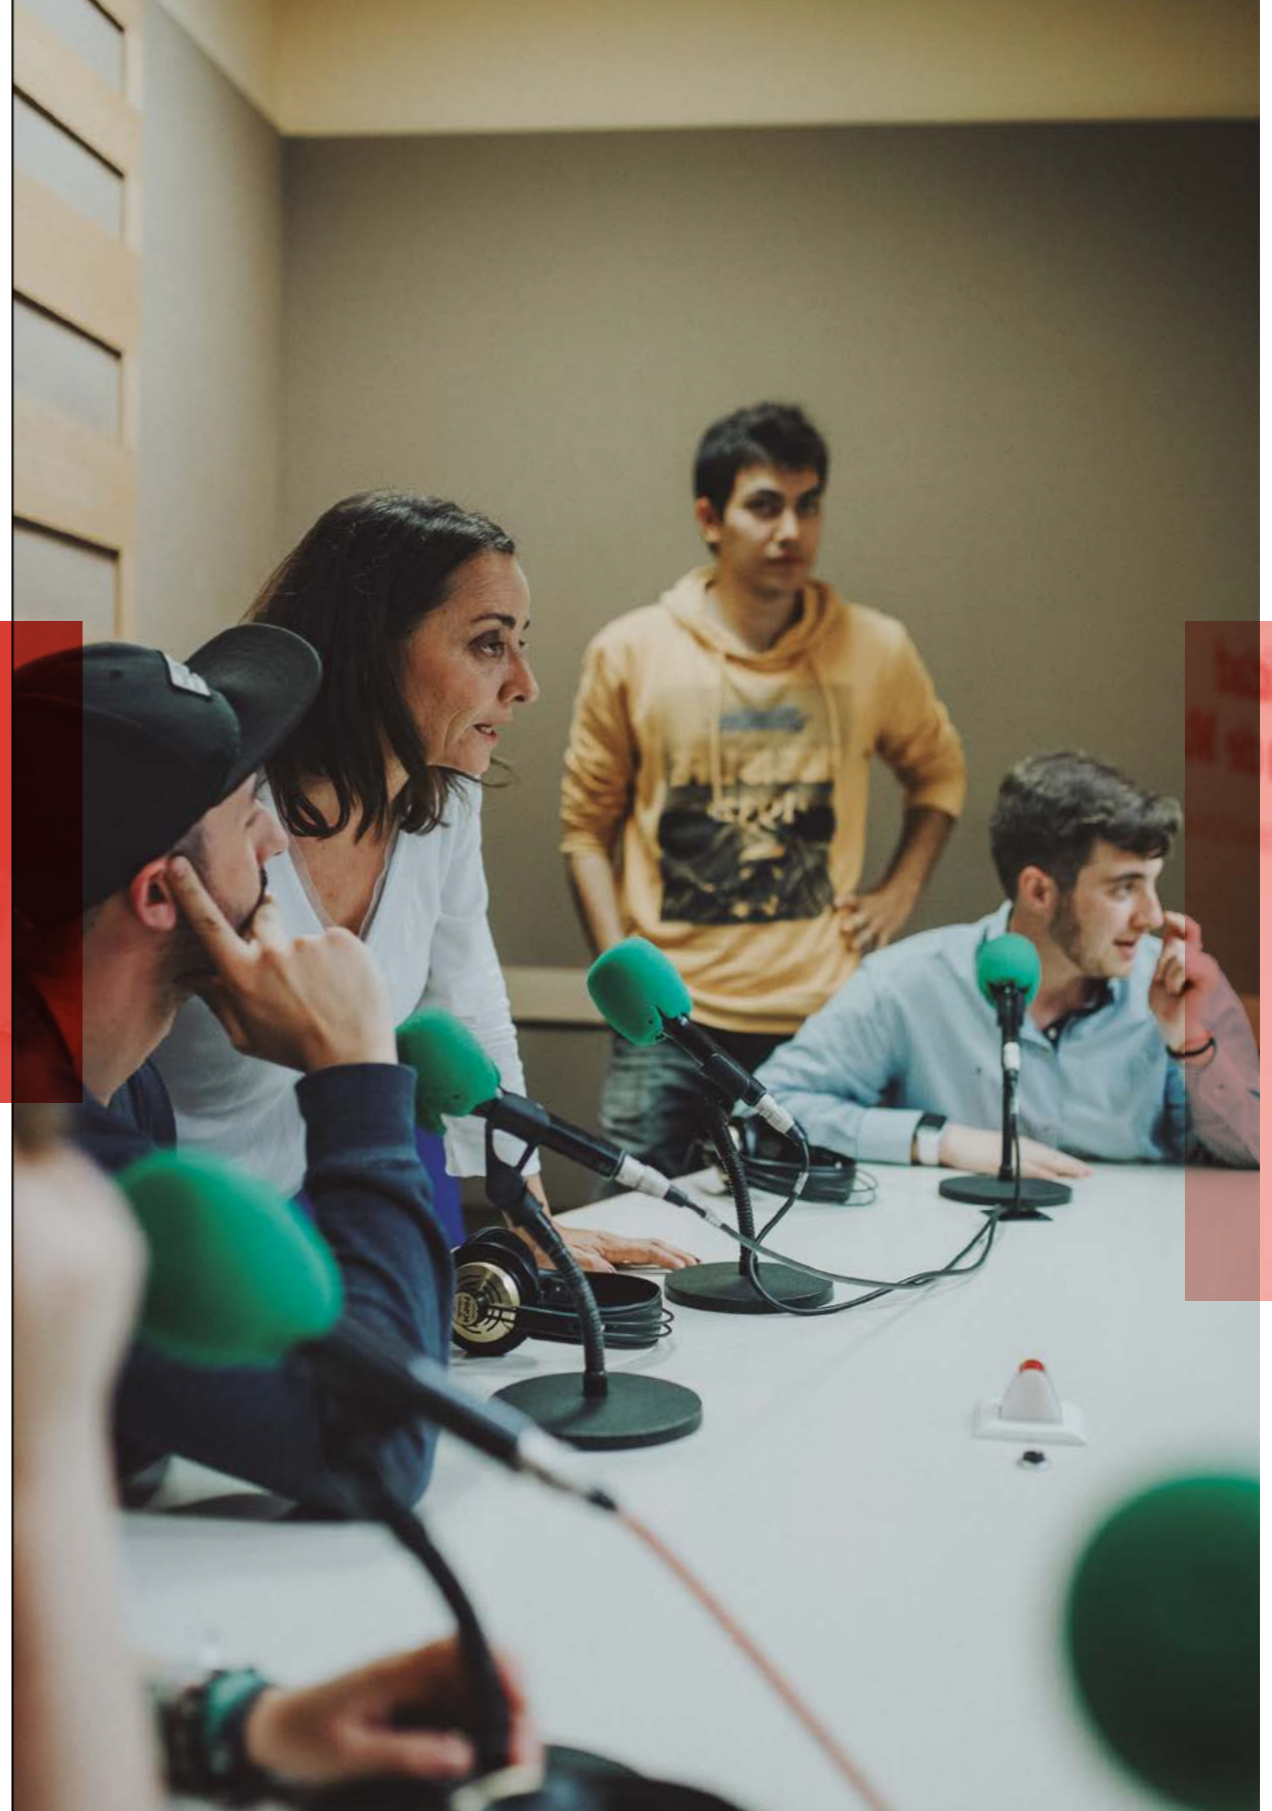

Round tables, conferences and seminars

We schedule regular meetings through conferences, round tables and seminars so you can learn about the real world and the keys to success from renowned professionals and world leaders. We have been visited by heads of state such as **Bill Clinton**, **Tony Blair** and **Felipe González**; figures such as **Daniel Goleman** and **Zygmunt Bauman**; and top-level business icons like Apple co-founder **Stephen Wozniak**. We also offer you different perspectives and encourage debates on different issues of interest with talks run by the TEDx community.

Clubs

You can also enjoy university life by joining our clubs, which have been recognized on various occasions for their contributions; including the UEM Formula club or the Europea Media Communication club.

The Universidad Europea spirit is alive not only in the classroom. Our spirit is evident in debate workshops and practice rooms, in the associations of students interested in sport, medicine, design or engineering. Our spirit can be noted in Clubs, initiatives organized for and by our students.

Educational model

- **Biomedical and Health Sciences**
- **Architecture, Engineering and Design**
- **Social Sciences and Communication**
- **Sports Science**
- **Real Madrid - Universidad Europea Graduate School**

"I feel like I'm growing on an academic and personal level, learning skills that will help me at work and in my private life. At last I've been taught to learn how to learn."

Juan Enrique Sole Rubio

Student on the Double Degree in Criminology and Psychology

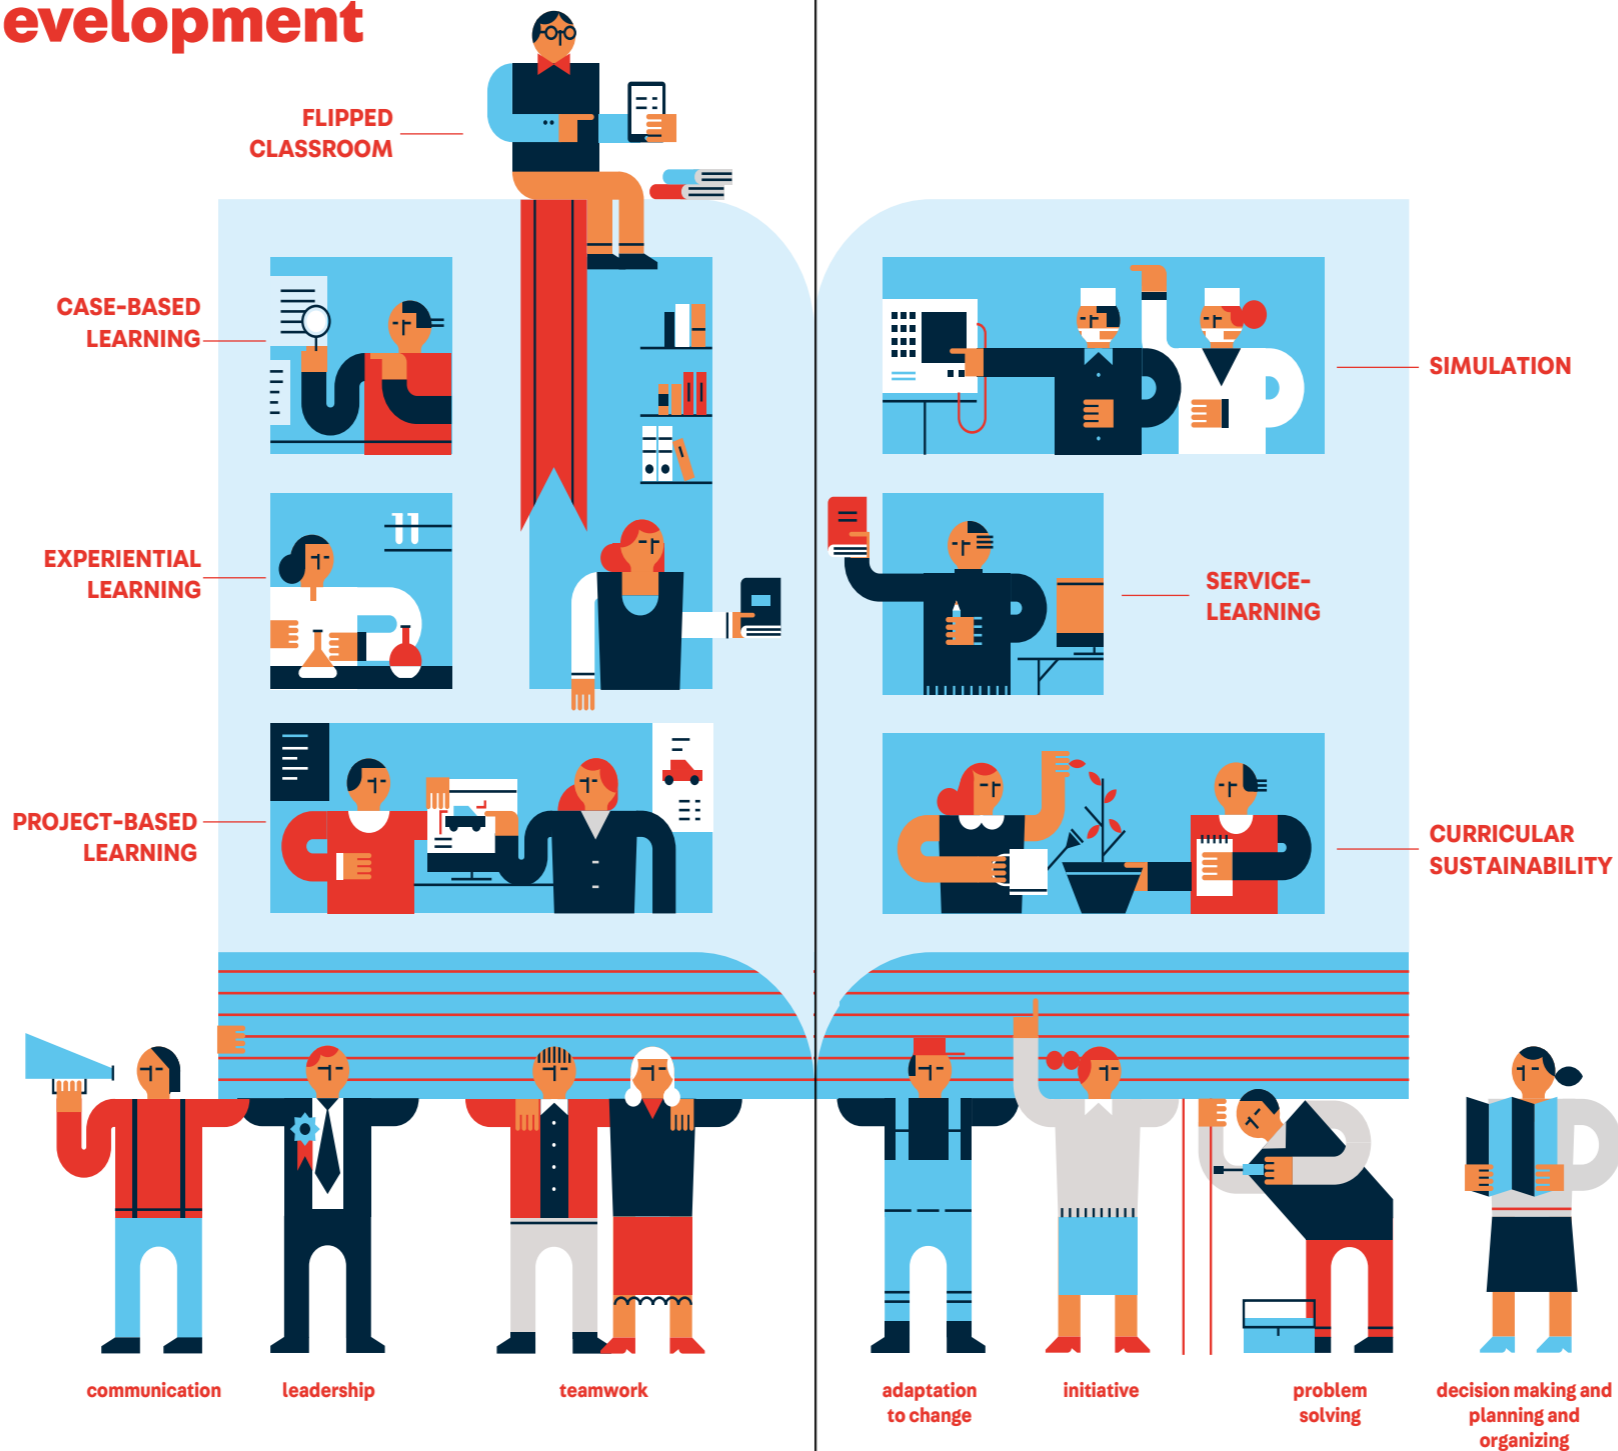

An educational model focused on your professional development

Get an interprofessional education

At Universidad Europea you will learn through a pedagogical model that encourages team work among students from different areas of study in order to simulate real professional environments where different teams must collaborate to carry out successful projects.

You will develop your skills through experiential learning

You will have the opportunity to deal with real situations and cases through projects based on experiential methodology, guided and supervised by approachable and highly committed professors, at state-of-the-art facilities with the latest technologies.

Stand out in the professional world with a unique certificate

When you graduate you'll receive much more than an academic transcript. With the **Laureate Professional Assessment (LPA)** we certify you in the eight competences most sought-after by businesses, and which are the focus of our educational model: strategic and entrepreneurial approach; leadership; teamwork; adapting to changes; personal learning and development; problem solving; achieving goals; and global mindset.

The LPA is a certificate that guarantees your skills profile and provides information on your added-value training experiences at the University (such as internships, periods of study abroad, or participation in social responsibility projects), together with your academic transcript.

Our students get excellent results. 95% of our Medicine graduates exceed the MIR cutoff score, taking the top spots (MIR 2017: two of our students were ranked 14 and 115).

"I gained another language. Now I speak Spanish and I can work in Europe."

Luc Aouad (Lebanon)
Student on the Bachelor's Degree in Dentistry

"They're always there to help us when we have a problem."

Rym Dar Chérif (France)
Student on the Bachelor's Degree in Physical Therapy

Biomedical and Health Sciences

At the School of Biomedical and Health Sciences **you will learn through an innovative educational model that encourages interprofessional education** with other healthcare professionals, just like you will in your professional future.

You will get insight into professional practice with clinical internships supervised by active professionals, based on **resolving real clinical cases in simulated or virtual reality environments**, in pioneering laboratories in Spain equipped with the latest technology developments.

Simulation will also be used as a successful assessment method thanks to the Objective Structured Clinical Assessment (OSCA), where clinical case scenarios are simulated so that the professor can assess your skills in different situations with standard patients.

You'll take another step in your education with internships at leading biohealth institutions and businesses (Internship agreements with Hospital Universitario de Getafe, Infanta Sofía, Grupo Hospitalario Quirón, Hospital Universitario ASISA Moncloa, CESIC, ASEBIO, Lilly and Grünenthal Pharma, among others).

The international approach, with a constant influx of students from other countries and the opportunity to study in other languages or spend periods of study at international universities, reinforce your skills and make you a versatile health

professional who is better prepared for the global market.

Simulated Hospital

Universidad Europea has a Simulated Hospital where you can gain real clinical practice from the get-go, with the security of working in simulated environments.

The Hospital has an emergency room, intensive care, admissions office, an operating room and a birth simulator. A unique environment that will prepare you to successfully complete your internship with real patients.

Dental Health Clinics

We have three dental health clinics in Madrid and Valencia.

The clinics have cutting-edge facilities equipped with the latest technology such as operating microscopes, Vistascan, CBCT, Intraoral Scanner, Smile Design, etc., as well as all the materials and instruments needed so that students can offer their patients a comprehensive diagnosis and treatment. In this way they can offer the highest quality care and gain professional experience.

“I found great support throughout my learning experience, professors who did not merely stick to the same old things, but who planted the seed of curiosity in me, the seed that really makes you feel passionate about what you do: motivation, knowledge, evolution and professionalism.”

Noelia Contreras Egea

Alumna, Bachelor's Degree in Computer Engineering. Programmer at Deloitte

Architecture, Engineering and Design

At the School of Architecture, Engineering and Design **you'll learn with the Project Based School (PBS) methodology**, working on real projects linked to companies as part of multidisciplinary teams, developing knowledge and interacting with areas of knowledge that will enrich your learning.

- Only here can you study subjects dedicated to cross-disciplinary projects and internships every year.
- Learn with professionals: Over 50% of our faculty are active professionals, and many of them have received awards for their professional activity.
- You can join over 10 clubs where you can develop products with classmates from different areas: Robotics Club, Air Division, UE Gamestudio, BIM Club, Digital Manufacturing, GraphicalLab, etc.

→ From day one you will have access to facilities equipped with the latest technology, such as a digital manufacturing workshop for architectural models and prototypes using cutting-edge software (FabLab), electronics, mechanical and robotics labs with tools such as MatLab, Ansys, Catia, Rhino, Solidworks, Is-tram, Sap, Finalcut, etc.

→ You can join a list of students from this school who have received awards for their projects, such as Archiprix.

Students' real projects are recognized by industry professionals.

The Airbus ProtoSpace idea incubator backed a project by Alfonso Parra, an Aerospace Engineering student. After Alonso completed his internship at Altran, Airbus took note of his project and asked him to join its team.

The Graduation Project by Asen Lyubenov, an Industrial Electronics and Automation Engineering student, took 2nd prize at the best Engineering GP competition of the Autonomous Community of Madrid. His project on improving vehicle ergonomics is based on a 3D steering wheel he designed and printed himself.

“My experience at the University is spectacular, it meets all my expectations and our professors are top class.”

Santiago Anda (Ecuador)
Graduate Degree Student

Social Sciences and Communication

Our School of Social Sciences and Communication prepares you to become a global professional with experience in strategic business areas. We help you achieve your goals in a setting where you can develop skills such as leadership and critical thinking so you can have an impact on society. Our solid, experiential and collaborative educational model challenges you intellectually.

Its main characteristics are:

- **Case-based learning:** You'll work in real settings and on real projects, and as a part of a team with students from other areas of study. This is possible thanks to the Consulting Lab, Media Labs and the Legal Clinic.
- **International focus:** Being global is an attitude to a world of opportunities and without borders. We foster learning in a multicultural, flexible and tolerant environment.
- **High employability:** Through our Global Programs, agreements with prestigious universities such as the London School of Economics, and the companies we have internship agreements with, you'll acquire the necessary skills to compete in global environments.

→ **Comprehensive skills development:** Skills such as teamwork, effective communication or analyzing information are necessary so that you not only attain high employability, but also achieve life goals. That's why we promote and assess them.

“Transición, pactos para el recuerdo”, a documentary by students, took 2nd prize at the documentary competition held at the ‘La Transición española, 40 años después’ International Conference.

The documentary, led by a group of students from the School of Social Sciences and Communication, features first-hand accounts from those who personally experienced the transition to democracy that contrast with the ignorance of students on that historic event.

The School of Social Sciences and Communication has set up a Legal Clinic to help the most disadvantaged.

This project, devised to offer legal aid services and training to people with limited resources, was possible thanks to the support and collaboration of various institutions committed to social impact.

“I received a great deal of practical content and training in skills that are essential for the professional world, such as leadership or teamwork. This was a turning point in my personal and professional development.”

Jorge Rey

Student on the Double Degree in Sports Science and Physical Therapy

- Subjects are taught at a **35,000m²** top-level sporting facility and in the most advanced laboratories.
- Study on campus with students from other countries. You can also **complete your studies with periods of study abroad or international internships** at institutions with a strong reputation for Sports Science such as San Diego State University, the College of New Jersey or Victoria University.

Sports Science

The School of Sports and Exercise Sciences opens the doors to research and innovation in the world of sport with its educational model of recognized quality.

Its main characteristics include:

- **You'll receive primarily practical training** where you can choose from 11 sporting areas, such as golf, winter sports or outdoor activities that you can only study here.
- **We take the health-related role of the sports and physical therapy professional** to the most advanced profiles, thus contributing to successful social and professional progress.
- **You'll learn from leading international professionals** in the sector who combine teaching with professional and research activities.
- You'll receive **innovative training**, with learning based on the case study method, working with professionals from other disciplines, and developing cross-disciplinary skills.

In 2017, a team of Universidad Europea professors and students analyzed the economic impact of the previous year's Mutua Madrid Open tennis tournament.

The analysis, led by professors from Universidad Europea and the Real Madrid - Universidad Europea Graduate School, included **the collaboration of 6 professors and 46 students** of Sports Management, Sports Science, and Sports Science and Physical Therapy, **who will also analyze the impact in 2017**. In addition to these figures, the study extracted data on the impact of average spending per spectator (€298.84), generating jobs and social impact (3,713 direct and indirect jobs) and **state income (€17.45 million)**.

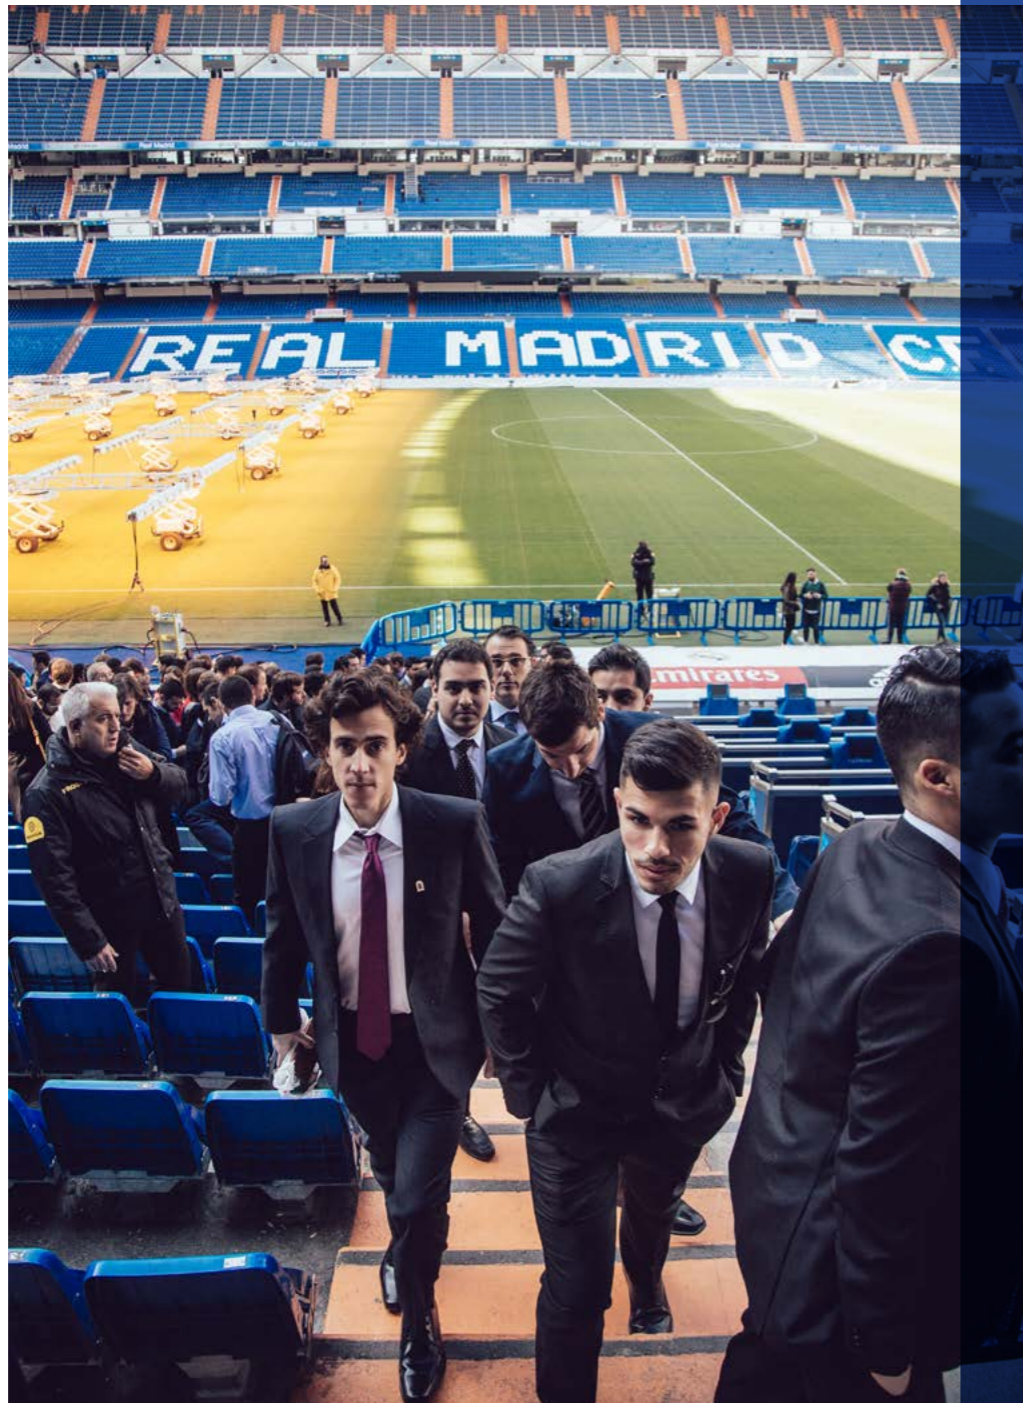

“Only this School organizes –and exclusively for us– activities with Zidane, Butragueño and the professionals and executives from Real Madrid, giving us the opportunity to exchange opinions and feel part of it.”

Antonio Alonso Mazario

Student from the Master's Degree in Sports Entities Management (MBA)

A school that transcends the limits of sport

**Escuela Universitaria
Real Madrid**
Universidad Europea

Real Madrid – Universidad Europea Graduate School

At the Real Madrid - Universidad Europea Graduate School you'll learn among leading sports professionals. Our graduate programs are based on the vast management experience of Real Madrid, the world's leading club in terms of income, results and solvency, and the academic guarantee of Universidad Europea, a pioneering institution in higher education in Spain. Our wide ranging educational programs are the result of a groundbreaking alliance that combines innovation, prestige and quality.

As a future student at our school you understand that sport is a true social phenomenon that goes beyond pure competition. You trust in the power of sport to generate unique benefits in terms of financial wealth and employment, as well as to help develop more plural and healthier societies. **The Real Madrid - Universidad Europea Graduate School** was founded in 2006 to respond to this new global, multidimensional concept of sport from a groundbreaking perspective.

Real Madrid is the world's most successful club. It has over 110 years of history and experience in sports management. Recognized as the "Best Club in the 20th Century" by FIFA, and the sporting entity with the highest income according to Deloitte annual reports. Forbes Magazine ranks it as the most highly valued sporting institution in the world.

Studying at the **Real Madrid - Universidad Europea Graduate School** will make you feel what it means to manage a club from the inside. The most prestigious club in the world. Your teach-

ers, senior Real Madrid executives, will be fully involved in your learning and will share their knowledge and experience in Finance, Procurement, Human Resources, Marketing, Infrastructure, Legal Services, Communication and Medical Services with you. **A real challenge to train the professionals who will define the future of sport.**

A global experience in and outside the classroom.

→ The Real Madrid - Universidad Europea Graduate School advocates an eminently practical educational model. That's why all our graduate programs are offered at cutting-edge facilities. Inside and outside the University. The Alcobendas and Villaviciosa de Odón Campuses in Madrid are joined by the **prestigious Santiago Bernabéu Stadium and the stunning Ciudad Deportiva Real Madrid training facilities.** During your training you will regularly visit these last two venues to attend interesting classes and workshops. **Because at our school you learn outside the classroom too.**

→ With our educational model the daily activities of Real Madrid executives become **exciting real-time case studies.** This practical approach is based on the best possible methodology: the one explained and shared by the main players at Real Madrid. Additionally, most graduate programs include **visits to companies, events or facilities** that will keep you up-to-date on the latest trends in each sector.

Sports Trend Lab. The Real Madrid - Universidad Europea Graduate School has launched this research laboratory to analyze the ten main trends in the world of sport, and how the sector impacts society and growth in Spain. Technology, marketing, sponsorship, economics and law are some of the areas of study at this innovative think tank.

04.

Areas and types of studies

"I think that the level taught is well thought out for the future professional approach that you find when you leave here."

Jaime Benito

Sports Science alumnus and physical therapist at Real Madrid CF

We deliver more than 250 degree programs in all areas of knowledge, in campus-based, semi-campus-based or online format:

DEGREES AND DOUBLE DEGREES

Your university studies start here, in the area of knowledge that you choose. Our pillars include employability, internationality and strengthening your skills and competencies in a practical environment.

ADVANCED CAREER AND TECHNICAL EDUCATION. Enroll in professional training at our university campuses in Madrid or Valencia and gain access to the labor market in 2 years. And, at the end, you can complete your professional profile with a Bachelor's Degree.

GRADUATE and MASTER'S DEGREES. Our academic courses include both Master's programs that qualify you to exercise your profession, and a portfolio of programs to enable you to specialize in your sector, with cutting-edge resources and professors who are up to date with the latest innovations and trends.

DOCTOR'S DEGREES Doctor's degrees are a way to introduce professionals into scientific research in their field so they can then apply knowledge to society.

Discover our facilities

Madrid

Villaviciosa de Odón

As the largest campus, it stands out for its modern facilities and specific laboratories for each area of knowledge. It has cutting-edge educational resources, two university dormitories and a sports complex equipped to practice eleven sports.

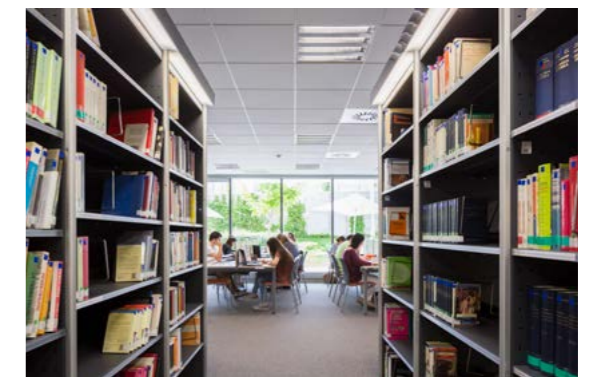

Our campus is also home to many of our students. It has two university dormitories surrounded by green areas for a relaxing, enriching environment. Without a doubt the perfect way to complete your education and make your stay in Madrid a real experience of a lifetime.

Our dormitories have all the services and facilities you need to enjoy this unforgettable period. Double or single rooms with en-suite bathroom, library, cafeteria, theater or cinema rooms and cleaning, laundry or medical services are just some of the facilities you'll find on campus.

Alcobendas

Equipped with modern, cutting-edge facilities, this campus is designed as a unique space where the University is in permanent contact with the business world, without a doubt a key factor for the comprehensive development of our students.

Canarias

Since 2012, Universidad Europea has had a campus on the island of Tenerife to bring its distinctive model of innovative, comprehensive, quality education to the Canary Islands.

We are the first international university on the Islands and at our Campus in La Orotava (Tenerife) we boast a cutting-edge academic model that is unique to the islands, and whose main purpose is to turn our students into highly-employable professionals.

Valencia

The Valencia campus is located in Valencia city center: opposite the Jardines de Viveros right on Avenida Aragón, connected with the city's business and university area.

It has four buildings housing two libraries, communal study areas, laboratories for various departments such as architecture and languages, as well as its own dental health clinic.

University clinics

University Health Clinic Madrid

Our students receive practical training at modern facilities in the specialties of Dentistry, Podiatry, Physical Therapy and Optometry.

Dental Health Clinic Madrid

We have a 2,000 m2 clinic with cutting-edge facilities where students in the final years of Dentistry can acquire extensive experience before they enter the professional world.

Dental Health Clinic Valencia

At this approximately 1,000 m2 clinic, students perform Dentistry clinical internships with the latest technology and provide healthcare with the support of the best professionals and teachers.

Location: center of Madrid and Valencia.

***“The places I’ve seen,
the people I know,
it’s a very welcoming culture.”***

Nada Lazrak (Morocco)

Advanced Diploma in Auditory Prosthetics student

A multicultural, vibrant and welcoming country.

-  **Historical heritage**
-  **Museums and art centers**
-  **Gastronomy**
-  **Culture and shows**
-  **Leisure and nightlife**

Experience... Madrid

Madrid is the heart of the country and a privileged meeting place for cultures, ideas and trends. Open to the world any time of day or night, it's a **modern, cosmopolitan city full of energy**. Its streets combine centuries of history, life and tradition with the latest fashion and cultural trends. Home to many multinationals, Madrid is also an outstanding business center offering a wealth of opportunities for your professional development.

Madrid's artistic and leisure options place it among Europe's most culturally rich cities. The Prado Museum, the second most important art gallery in the world and home to artists such as Velázquez or Goya, the Reina Sofía Museum, the resting place for Picasso's Guernica, are two of its star attractions.

Madrid is pure life. Authentic, diverse and vibrant. Its inclusive nature means that anyone immediately feels at home. **Because when you come to Madrid, you're already from Madrid.**

Valencia

Valencia wouldn't be Valencia without the Mediterranean Sea. Or without the diversity of its architecture, history, culture, and tradition. Always on the cutting edge and looking to the future, in recent years it has experienced an extraordinary development that puts it at the forefront of creativity and economic activity in Spain. **Valencia is a radiant, cheerful city that will welcome you with open arms from day one.**

The monuments and places of architectural interest combine with a varied range of cultural and leisure options, with the City of Arts and Sciences as its most modern flagship. At this venue, the most important of its kind in Europe, you'll find exhibitions and events that are good enough for any city in the world.

Valencia is also an **unmissable destination for any enthusiast of gastronomy, pop culture and sport**. At its restaurants, bars and sidewalk cafes you can try the best paellas in the world. On the city streets you'll experience the Fallas like any other Valencian, a festival declared World Heritage by the UNESCO. Its sports facilities will let you experience the emotion of international European championships with the Formula 1 Grand Prix or the Tennis Open.

Valencia wouldn't be Valencia without the Mediterranean Sea, but the Mediterranean wouldn't be the same without Valencia. You'll fall in love with the beaches, climate and people of this coastal city.

the island. In Tenerife you'll have the chance to experience one and many islands all at once.

Natural wealth is one of the economic engines of the largest, most populated island in the Canary Island archipelago, which also offers areas to practice many sports and enjoy unique cultural activities. Such as the unique Carnival of Santa Cruz de Tenerife, the second largest in the world behind Rio de Janeiro.

Canarias

Living and studying on an island is a unique experience accessible to very few people.

Tenerife, the largest of the seven Canary Islands, looks out to the Atlantic Ocean from its endless sandy beaches, a major attraction for millions of tourists from around the world. And also from the peak of the Teide, the highest point in Spain and the island's most visited natural wonder. Dizzying cliffs and lush forests full of prehistoric species complete the variety of landscapes on

During your stay on the island you'll be just 30 minutes from the capital, in the town of La Orotava, one of the spots with most history and tradition at the heart of Teide National Park. The Canary Islands, in permanent contact with the rest of the continent, offer direct flights to

Europe's main cities. **But when you arrive you won't want to leave.**

Accommodation

At Universidad Europea we know that coming to a new city is a challenge that will test your ability to adapt to an unknown, exciting environment. It's also an enriching process that will help you develop as a professional and a person in an increasingly global, hyper-connected world. **Welcome to a unique stage in your life that you'll remember forever.**

Our commitment is to guarantee students a quality stay at our University and in Spain. That's why we've compiled a series of accommodation options so you can choose **what best adapts to your needs, taste and possibilities:**

→ MADRID

We offer two university dormitories at our Villaviciosa de Odón Campus (Madrid) that will cover all your needs.

More information at <http://madrid.universidadeuropea.es/alumno-uem/soy-nuevo/alojamiento>

→ VALENCIA

Valencia offers different accommodation options for students. Various agencies will help you find them.

Madrid and Valencia Accommodation Service

Universidad Europea has collaboration agreements to offer accommodation, integration and other services to international students via the following platforms:

- BookingforStudents
www.bookingforstudents.com
- MadridEasy
www.madridenteasy.com
- CityLife
www.citylifemadrid.com

→ CANARY ISLANDS/TENERIFE

La Orotava offers many affordable housing options, just a short distance from the university campus. Students can look for shared apartments using any of Tenerife's housing agencies, such as Inmobiliaria Inmorotava (www.inmorotava.com)

Research

→ Research is our passion

"I had the chance to develop my graduation project based on a new line of scientific research. It consists in characterizing a plant extract whose function is to increase secretion of a hormone called ghrelin that stimulates appetite in living organisms. Our goal is to create a treatment for anorexic patients, which would have an enormous social impact."

Cristina Mateo Yusta
Student on the Bachelor's Degree in Biotechnology

Research is our passion

Universidad Europea is committed to **high-quality rigorous international research** which responds to the needs of today's society.

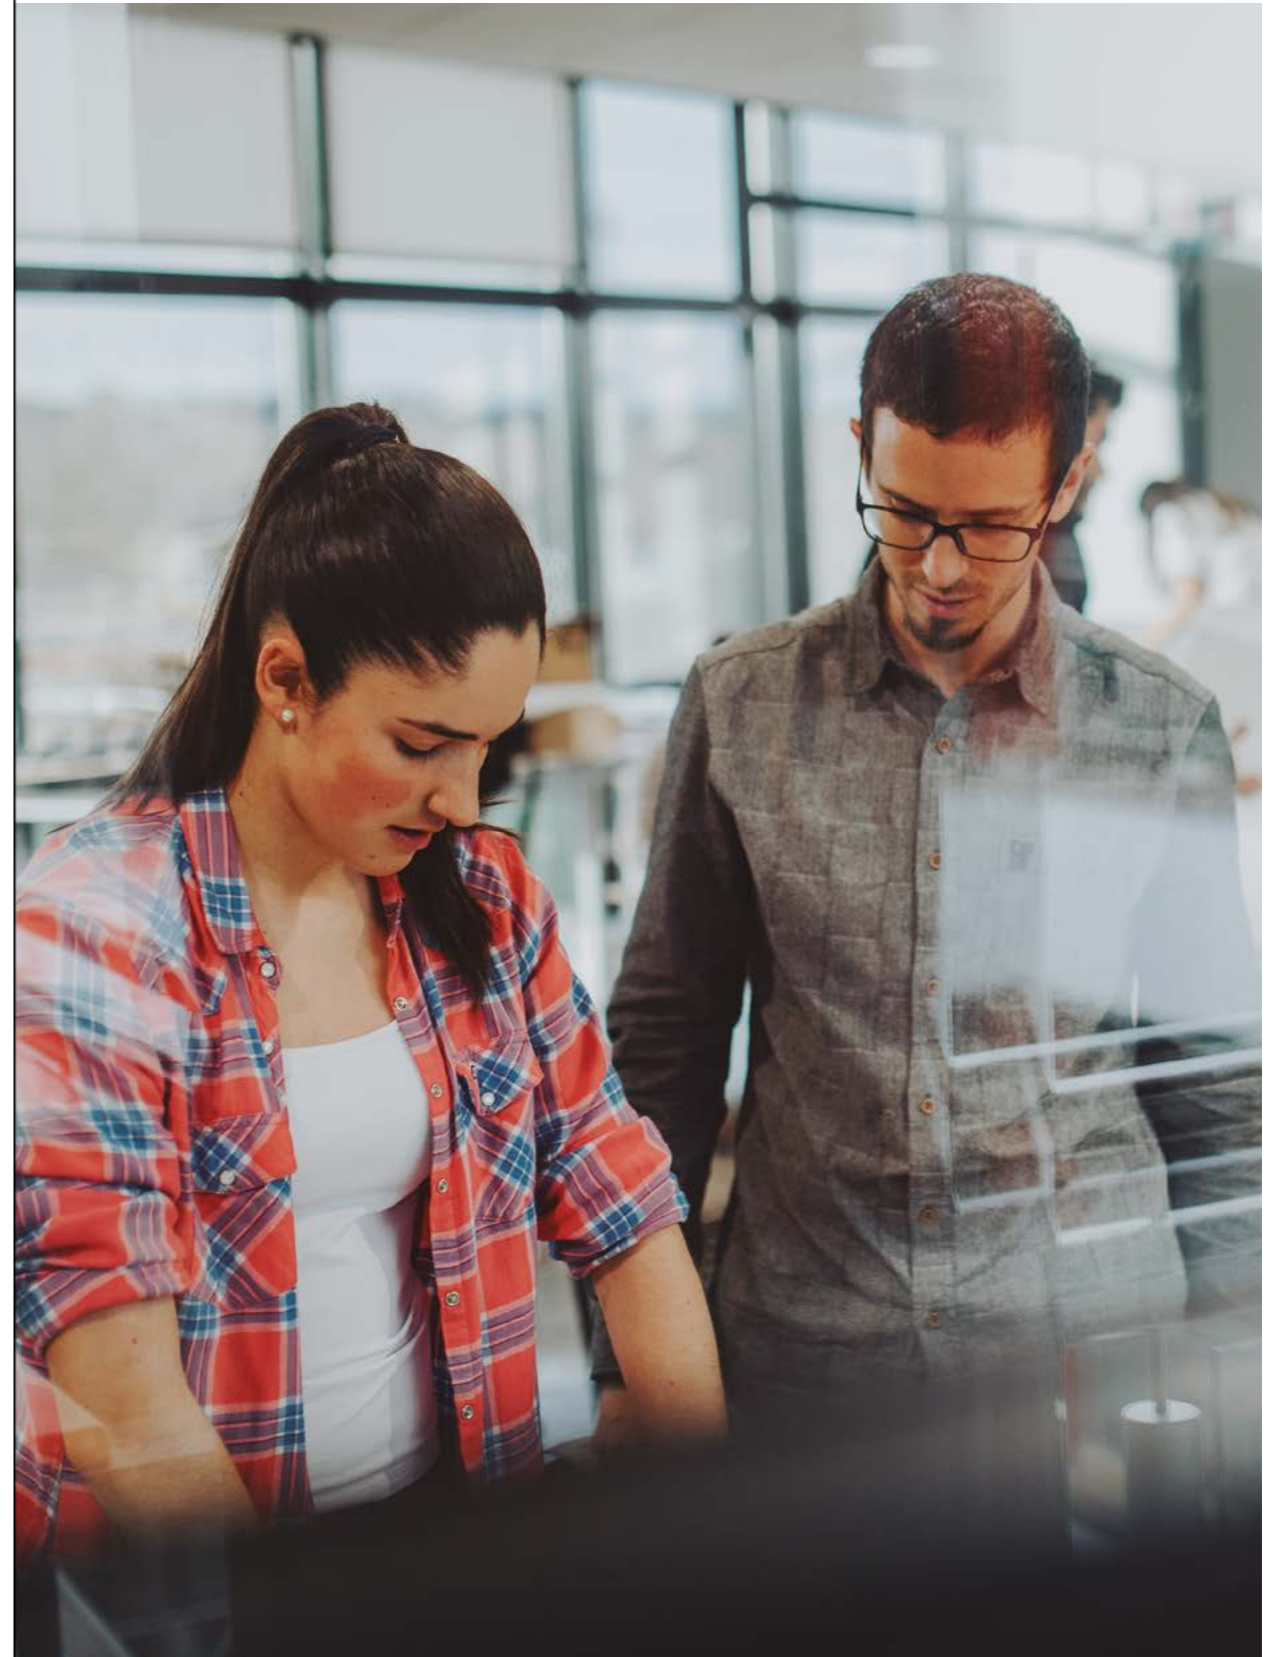

In 2016 we were once again the **second private university in Spain in terms of scientific contribution** and one of the leading schools in the country and abroad for sports and health research, according to the I-UGR ranking of Spanish universities.

We are committed to applied research that is closely linked to business, as demonstrated by our position **among the 25 top European universities in terms of a regional research focus, according to data from U-Multirank.**

We expose our students to research from their first contact with the University, inviting anyone interested to join our more than 40 active research groups at our Health, Educational Innovation, Society and Engineering, and Architecture centers.

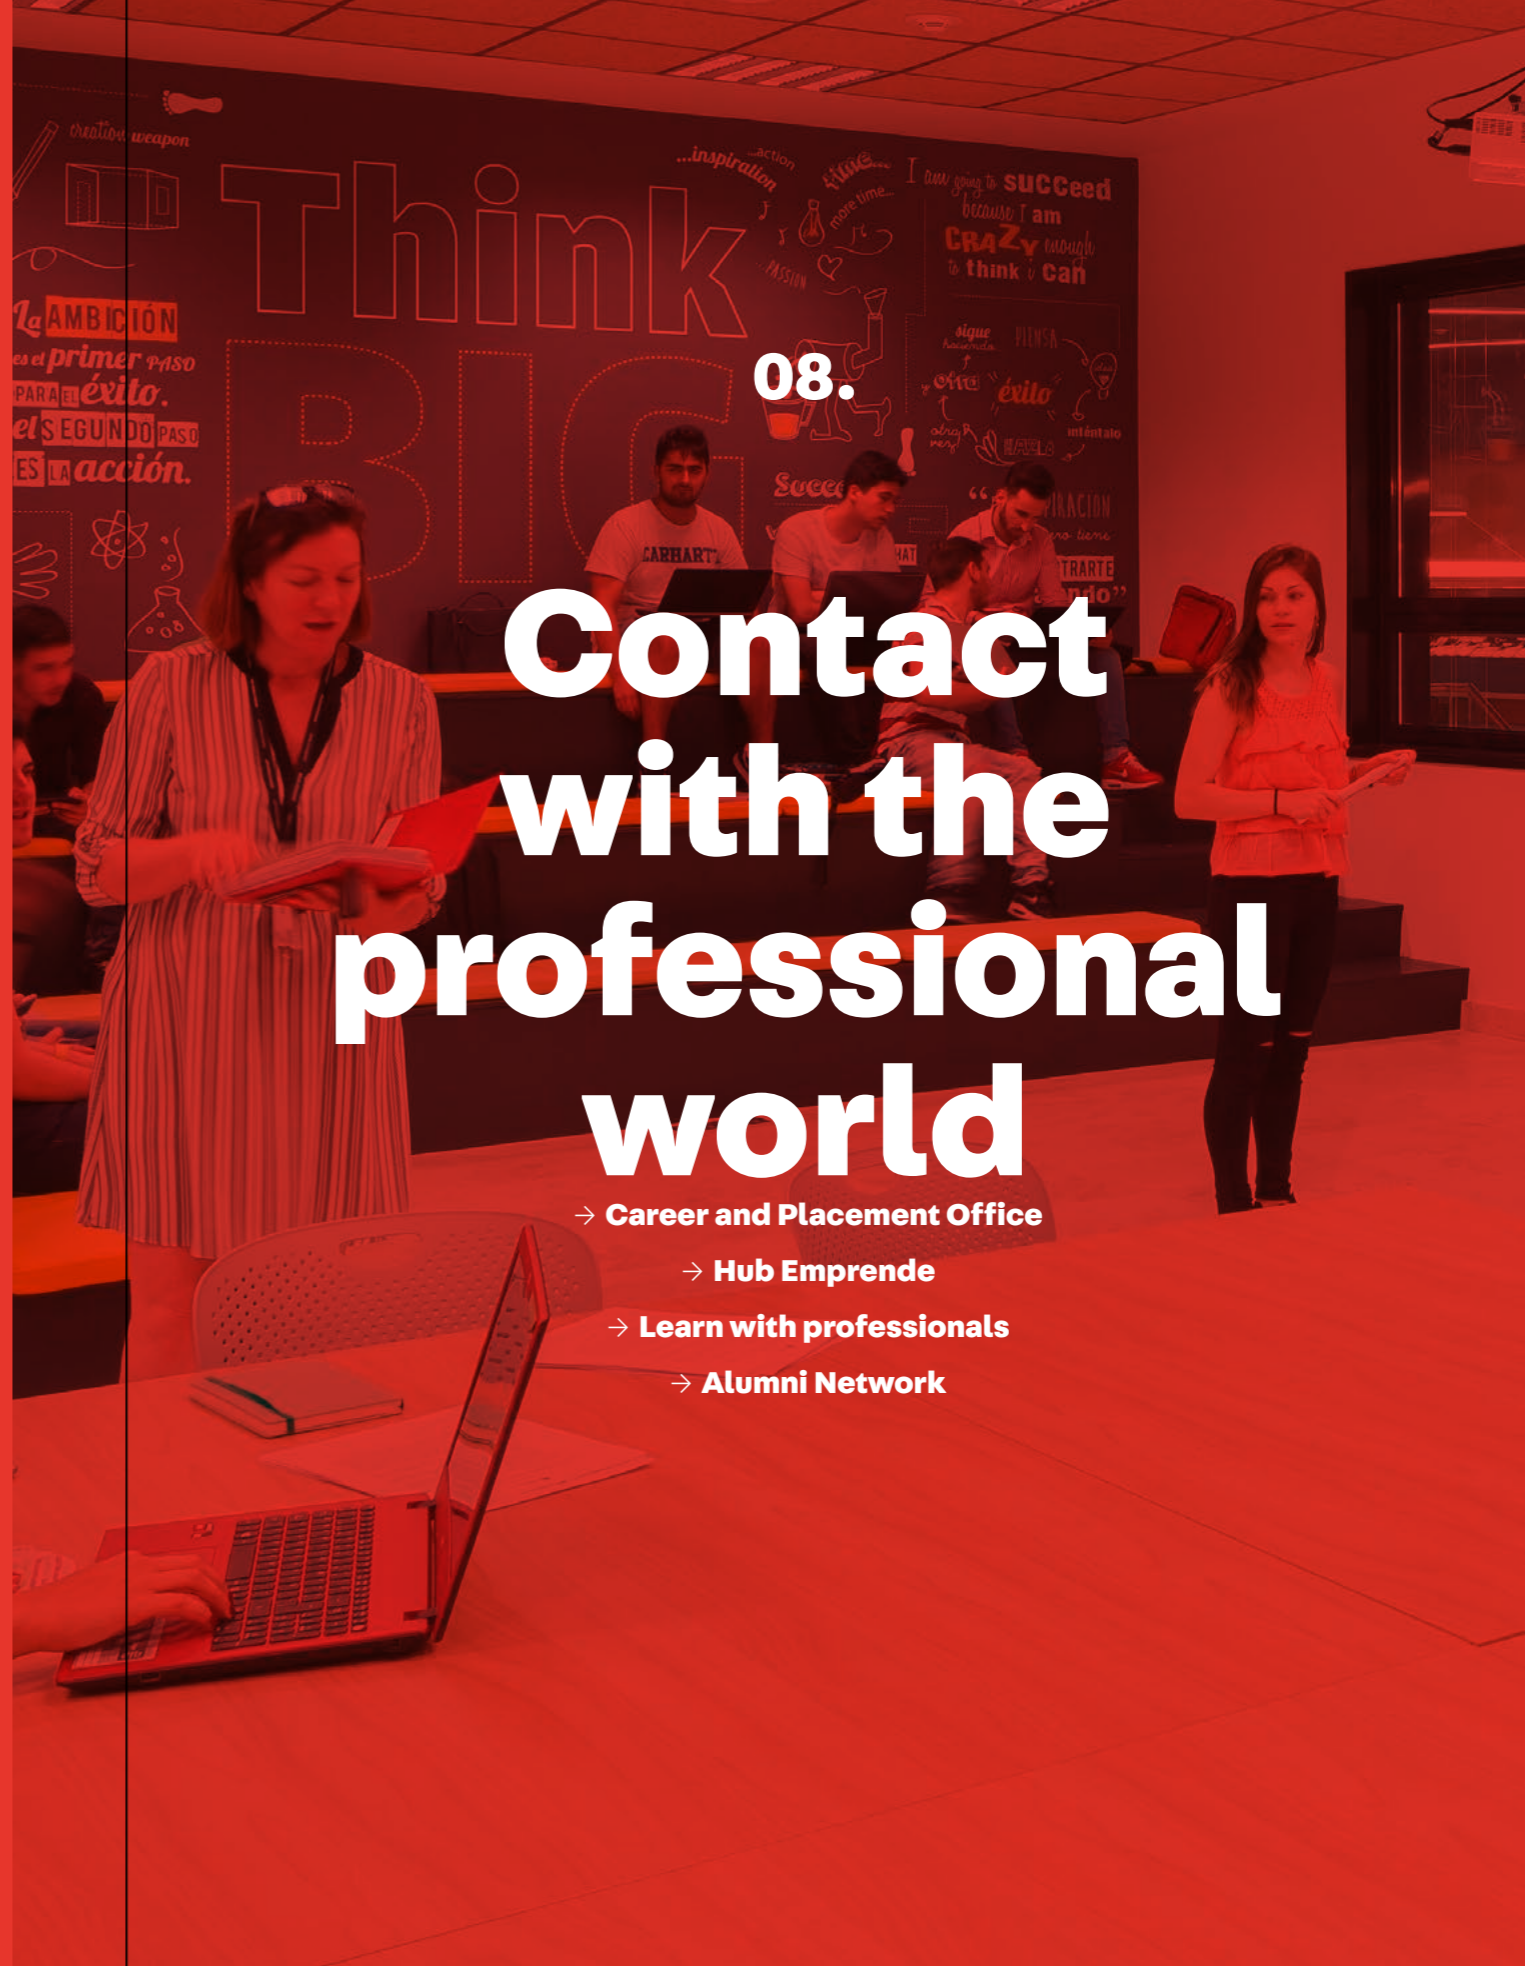

A joint project by the Schools of Architecture, Engineering and Design and the School of Doctoral Studies and Research, chosen to redefine the lives of two million people in a Chinese city.

This design proposal for seven green-bridges over Dishui lake, the epicenter of the new city of Lingang in Shanghai, China, is the result of combining the latest technological innovations with complete integration with the landscape, and will end with the construction of seven bridges in collaboration with leading Spanish companies in Spain that are committed to innovation and sustainability.

***“Here they give us tools so you can adapt without losing your essence.
The Career and Placement Office is always there to help and offer advice at any time.
We receive personal guidance, including preparation for interviews and they help us to have a competitive resume.*”**

María Cano
Alumna, Bachelor's Degree in Sports Science

Contact with the professional world

- Career and Placement Office
- Hub Emprende
- Learn with professionals
- Alumni Network

Hub Emprende

We accelerate and help you develop your business idea with mentoring and training. More than 100 start-ups have passed through HUB as participants in the various entrepreneurship programs.

Nearly 15% of our students launch their own businesses each year.

Alumni network

Alumni is the network of former Universidad Europea students and it currently has over 50,000 members. Alumni is committed to accompanying graduates in their professional development. It therefore provides them with a series of services for creating contact networks and advancing their careers.

Career and Placement Office

89% of our students find employment less than 12 months after completing their studies. Among other achievements, this makes us the Spanish university with the highest employability score in the "QS Stars" international rating.

We make available to you the **Career and Placement Office**, a truly useful personalized career guidance service: it has the highest employment rate of all Spanish universities. This department manages 3,500 cooperative education partnerships with businesses. You'll be in contact with the professional world, we'll

help you create a network of contacts and you can take part in internship programs.

Global Career Week: The Career and Placement Office organizes this leading event offering a global outlook on the job market and the careers and professional profiles in highest demand.

Learn with professionals

60% of our professors combine their teaching with professional work at companies.

Learn with professors who are also active professionals in their sector. They have also been trained in our unique pedagogical model, which encourages active participation and guides you towards professional and personal development. The professor-student relationship is positively valued by students, who have rated their satisfaction with teaching staff 4 out of 5.
