

To Whom It May Concern

NorthTec is the only Northland-Based Tertiary Education Institute (TEI) that provides over 90 programmes ranging from Foundation to Degree Levels. We're transforming lives right here in Northland with campuses and learning centres in Whangarei, Kerikeri, Rāwene, Kaikohe and Kaitaia.

NorthTec is using UniAgents CRM system (Online Application Management System) for their Indian Sub-continent office to manage the international application process. Using UniAgents CRM we have fully automated the application process by generating the digital offer letters, tracking the applications history, managing all our agents and their reports on a centralised system, thus it has significantly improved our agent relationships.

Most of our agents are registered on Uniagents.com and it certainly reduces our efforts in finding new and potential agents in specific regions who can recruit students for us.

The team at UniAgents has been very professional and supportive and they have customized the system as per our requirements and always assist us in implementing the new features as per our specific needs.

I recommend the UniAgents CRM to those institutions that are looking for a pre-enrolment automated system and want to streamline and systemize their international office operations.

Sincerely,

Aditya Bhati
